## **APPLICATION ARCHITECT**

The Application Architect plans, coordinate, designs and supervises all activities related to the integration of software programmes, applications, and third-party solutions required to meet the business requirements of the bank. In this role, the Application Architect is responsible for developing and maintaining an application architecture blueprint for Advanzia. They also oversee testing of the interoperability of application modules under development by in-house software development teams, commercial-off-the-shelf software deployed at the bank and with external third parties. The Application Architect reports to the Head of Architecture and Technology and is also part of the Solution Architecture group.

### **ABOUT THE JOB** | What will you do?

As Application Architect you will be responsible for the following activities:

- Understanding the business strategy and design ideas to adapt the IT application landscape accordingly
- Participating in the architecture design process together with IT and business stakeholders
- Collaborating with other architects to correlate data architecture and application architecture landscapes
- Collaborating with the IT delivery teams to maintain the repository of the main application flows
- Maintaining application architecture blueprints for the bank
- Maintaining the application portfolio documentation in coordination with other stakeholders (Information Security, Data Protection, Compliance, IT Operations)
- Conducting surveys to collect feedback from business and IT teams regarding the portfolio of applications
- Maintaining a list of application-related risks as part of the overall risk framework
- Elaborating designs to support the implementation teams
- Supporting the Data Management function regarding the application/data flows and related models

### **ABOUT YOU** | What's your background?

- Higher university degree, preferably in computer science, information systems or related field, or equivalent combination of education and experience in a similar position
- One or more years of IT and business/industry work experience, including architecture design and deployment, application lifecycle management or software design
- Ability to maintain a complete application capability landscape
- Experience in aligning application capabilities with business needs
- Ability to apply architectural principles to business solutions
- Ability to assimilate and correlate disconnected documentation and drawings
- Experience in modelling application processes using a variety of tools and techniques
- Enterprise Architecture frameworks such as TOGAF or similar
- Agile mindset focused on continuous improvement
