APPLICATION SUPPORT & AUTOMATION INTEGRATION – JUNIOR OFFICER

The Application Support team is part of the IT department that monitors and maintains the efficiency of our business applications. They are experts in optimising and building business processes and in supporting our end users, which are both our employees and our credit card customers.

The Application Support & Automation Integration – Junior Officer reports to the Head of Application Support & Automation Integration.

ABOUT THE JOB | What will you do?

As Application Support & Automation Integration – Junior Officer, you will be responsible for the following activities:

- Providing software/business application support in a cross-functional delivery model (DevOps)
- Performing analyses on software application functionality and suggesting improvements
- Ensuring effective front-end and back-end functionality of applications
- Collaborating with software development engineers, testers, business analysts and internal/external users in order to improve application performance
- Managing code migration across environments to ensure continued and synchronised functionality
- Establishing the root causes of application errors and initiate resolution
- Keeping a record of configuration changes and scheduling application updates/upgrades
- Documenting processes and monitoring application performance metrics
- Providing support to customers and colleagues in business departments
- Providing on-call support on a rotational basis

ABOUT YOU | What's your background?

- Vocational training or diploma in Information Technology or similar and first professional experience in a similar position
- Troubleshooting, analysis and time management skills
- Good knowledge of the following:
 - SQL Server is a must
 - Core Banking System (Temenos T24)
 - Archiving platform (Documentum)
 - Customer communication platform (xPression)
 - Basic or advanced knowledge of workload automation platforms such as Automic will be considered an asset
 - Setting up and monitoring production jobs
 - Secure data transfer (internal/external)
 - Participating in coordination and deployment of new software releases in both User Acceptance Testing and Production environments
