

**LOOKING FOR MORE THAN A JOB?**  
**JOIN US!**

## **CLOUD INFRASTRUCTURE ENGINEER - OFFICER (M/F/D)**

As a member of the IT Services department, you will be located within the Infrastructure on Demand team supporting Advanzia Technical and Business teams with reliable and redundant Network and security services

### **ABOUT THE JOB** | What will you do?

As Cloud Infrastructure Engineer, you will be responsible for the following activities:

- Design, create and maintain optimal Infrastructure security components and services in Public Cloud hybrid infrastructure
- Drive optimisation, testing and security to improve cloud Infrastructure capability and resilience
- Review, approve and configure connectivity of Advanzia infrastructure with third party partners/service providers
- Ensure that proposed solutions by service providers are aligned and conformed to Advanzia infrastructure architecture guidelines and roadmap
- Participate in the transformation project of IT services and support corporate projects

### **ABOUT YOU** | What's your background?

- Bachelor's degree in IT, Computer Science, Information Technology Engineering, with public cloud or Hybrid Cloud experience
- Experience in automation via Bash/Shell scripting
- Experience with Infrastructure/Configuration as Code concept using tools like Terraform, Ansible
- Experience in building and maintaining Virtual Private Cloud (VPC) and Public Clouds (AWS, Azure) environments
- Practical experience in AWS/Azure/OpenStack infrastructure, including logging and auditing, VPC and network structure, IAM-based security models and must be highly familiar with a wide range of Cloud Services
- Practical experience in OpenShift and Kubernetes container-based designs, configuration and maintenance
- Knowledge and experience in internet routing protocols and concepts
- Excellent knowledge of Azure Infrastructure Services
- Experience working with Corporate Cybersecurity on infrastructure or applications security compliance and remediation activities (i.e.: Risk Acceptance, Security Configuration Baseline)
- Ability to solve complex infrastructure problems/issues using appropriate diagnostic and monitoring tools
- Exposure to DevOps tools and environment
