IT BUSINESS ANALYST (M/F/D)

The IT Business Analyst will have the opportunity to support all business stakeholders to deliver smart end-to-end banking solutions and (digital/mobile) products and services, which improve business processes and deliver value to our customers.

As part of the Digital Transformation & Platform Development Department, the Business Engineering team is responsible for the requirements and change management of the bank as part of all Projects and Strategic Initiatives. This opportunity is a full-time CDI contract.

ABOUT THE JOB | What will you do?

As an IT Business Analyst, you will be responsible for the following activities:

- Gather, analyse and specify complex functional and non-functional requirements for different business areas for e.g. customer frontends, products, business processes and our core banking system (Temenos Transact – T24)
- Collaborate closely with Business Owners and other internal stakeholders about the specifications for new functionalities, customer flows (UX), business processes and (digital/mobile) services
- Specify and document (non)functional requirements in form of epics, features and user stories for the technical delivery teams
- Provide sustainable business solution proposals and recommendations for implementation according to your analyses, and create end-to-end requirements implementation concepts, incl. technical solution design aligned with the different delivery and architecture teams
- Consult the delivery teams during the implementation, and support the value delivery process when it comes to backlog management, prioritisation, refinement, as well as sprint planning and communication
- Act as internal consultant for many different business functions, and manage various stakeholders proactively to clarify requirements incl. acceptance criteria
- Coordinate, define and align internal workflows and processes concerning new business processes, (digital/mobile) product functionalities and services with different teams and functions
- Provide status updates about deliveries on a regular basis to business stakeholders, and also closely collaborate with Project Managers when it comes to project planning and delivery
- Perform feasibility studies and in-depth assessments for new strategic projects and business initiatives
- Pro-actively identify and recommend best practices for automation and standardisation to improve and optimise business processes

WORKING FOR ADVANZIA

THE UNCONVENTIONAL BANK

ABOUT YOU | What's your background?

- Bachelor's or master's degree in economics or information systems, and/or equivalent relevant professional work experience
- Sound expert knowledge in the area of requirements or product management, functional solution and process design, as well as stakeholder management
- Ability to proactively drive and define end-to-end business solutions considering different stakeholders and requirements.
- Knowledge about banking/payment platforms or API-driven processes, (digital/mobile) apps, services and products is preferable
- Ideally, any additional certification as (Scrum) Product Owner, Business Analyst or Product Manager, and practical experience working with agile/lean methodologies like Scrum or Kanban

WHAT WE EXPECT | What are your skills?

- Excellent verbal and written communication and presentations skills, including the ability to interact confidently between different business functions, delivery and IT teams, and external partners
- Strong results, customer and solution oriented approach
- Well-organised person, able to work independently as well as part of a team and with a great sense of responsibility and ownership
- Strong analytical and conceptual skills to deeply analyse and evaluate cross-functional requirements and identify process concerns
- Fluency in English – any other European language is advantageous

WHAT WE OFFER | What advantages will you have?

- Attractive benefits as part of the banking collective agreement
- Wide range of additional benefits, e.g. Sympass, luncheon vouchers, transportation allowance, etc.
- On-the-job training
- Dynamic and international work environment
- Participation in various Corporate Social Responsibility (CSR) projects as part of the bank's [Advanzia Plus](#) initiative

Where you will be working
