# AZURE DEVOPS INFRASTRUCTURE-AS-CODE ENGINEER

**Want to dive into the world of IT Service Delivery?** We've got the perfect opportunity for you! As an experienced Azure DevOps Infrastructure as Code Engineer, you will design, develop, and maintain automated infrastructure solutions using Infrastructure-as-Code (IaC) principles within Azure environments. You'll collaborate closely with development and operations teams to ensure scalable, secure and efficient cloud infrastructure deployments.

**Dive in and get hands-on experience in the world of finance, payment and credit, working for an unconventional digital bank in the heart of Luxembourg!**

This opportunity is a full-time CDI contract.

## ABOUT THE JOB │ Your responsibilities

– **Design, build, and maintain** automated CI/CD pipelines and Infrastructure-as-Code using **Azure DevOps, Terraform and Ansible**
– **Deploy, manage, and secure** scalable cloud workloads and **containerised environments** on Azure
– Support **multi-region deployments** to ensure **high availability and resilience**
– **Automate IT infrastructure processes** across servers, virtualisation, storage, network, security and backup platforms
– **Monitor and optimise** cloud infrastructure for **availability, performance, capacity and security**
– Participate in **IT service management** activities including Incident, Change, Release and Business Continuity Management
– **Diagnose and resolve IT incidents**, documenting root causes and solutions
– Maintain accurate records of **configuration changes** and coordinate application updates and upgrades
– Document processes and monitor IT performance metrics for **continuous improvement**
– Collaborate with application support, development teams, testers and stakeholders to **enhance application functionality and performance**
– Provide technical support and guidance to stakeholders across the bank
– Act as the **IT Application Owner** for assigned applications and infrastructure components

€α ADVANZIA BANK

# ABOUT YOU | Your background, skills and personality

- **Degree in IT** or equivalent professional experience
- Min. **4 years' experience** in DevOps or DevSecOps role
- **Proven experience** in provisioning and orchestrating cloud and digital infrastructure (Azure, AWS, GCP)
- Fluency in **English** is essential
- **Hands-on approach**: Willingness to roll up sleeves and get involved, demonstrating a down-to-earth attitude to get the job done
- **Collaboration and teamwork**: A natural team player who thrives in a flat organisational structure, values input from all levels and actively contributes to the collective success of the team
- **Adaptability and flexibility**: Comfortable working in a dynamic environment, navigating change effectively
