BUSINESS PROCESS ARCHITECT (M/F)

Advanzia Bank is a European digital bank specialising in credit cards and card payment solutions for consumers, business partners and financial institutions. Advanzia was founded in 2005 in Luxembourg. With over 1.7 million active credit card customers, we are a leading online credit card issuer in Germany and have a strong presence in Luxembourg, Austria, France and Spain. As a result of our continuous growth, we offer many job opportunities for dynamic, skilled and open-minded team players!

ABOUT THE JOB | What will you do?

The Business Process Architect is part of the IT Services department, which supports the daily operations of the bank's production environment including project implementation, enterprise architecture, data management and provider management. The Business Process Architect will be responsible for the following activities:

- Charting existing business processes in order to define current business activities for the development of procedures and models
- Meeting with decision makers, systems owners, and end users to define business, financial, and operational requirements and systems goals
- Researching, reviewing, and analysing the effectiveness and efficiency of existing processes and develop strategies for enhancing or leveraging such processes
- Preparing and delivering reports, recommendations, or alternatives for improving processes in operating systems across the organisation
- Creating process models, specifications, diagrams, and charts to provide direction to delivery teams
- Prototyping new procedures for enhancing business processes, operations, and information process flows
- Liaising with various business groups in the organisation to facilitate implementation of new or improved business processes
- Performing cost-benefit and return on investment (ROI) analyses for proposed changes to assist management in taking implementation decisions
- Maintaining a list of business process related risks as part of the overall risk framework

ABOUT YOU | What's your background?

- Degree in Information Technology or equivalent combination of education and experience in a similar position
- Solid experience in business or process architecture
- Ability to decipher and organise complex business process requirements
- Familiar with business process modelling
- Proficient in TOGAF or a another architecture framework
- Knowledge of and previous experience with Business Process Management
- Solid understanding of the payment or banking industry
- Team player with a strong focus on influencing and soft skills
- An analytical mindset with strong communication and problem-solving skills
