TEST AUTOMATION OFFICER (M/F)

Advanzia Bank is a European digital bank specialising in credit cards and card payment solutions for consumers, business partners and financial institutions. Advanzia was founded in 2005 in Luxembourg. With over 1.7 million active credit card customers, we are a leading online credit card issuer in Germany and have a strong presence in Luxembourg, Austria, France and Spain. As a result of our continuous growth, we offer many job opportunities for dynamic, skilled and open-minded team players!

ABOUT THE JOB | What will you do?

The Test Automation Officer is part of the Test Management team within the Digital Transformation & Platform Development department and plays a key role in the value delivery process of the bank, covering the definition of test strategies, test design, as well as test execution, with a major focus on automation.

The Test Automation Officer will be responsible for the following activities:

- Design, develop, plan and implement test strategies covering various applications (frontend/backend) and workflows
- Design and execute automated (functional and non-functional) tests and automated end-to-end flows to ensure specific quality levels according to the business requirements
- Create and maintain automated scripts by use of the latest scripting techniques, and maintain the repository of automated regression tests
- Define and design the test automation infrastructure and architecture in alignment with internal IT teams
- Support the definition of test automation concepts for complex implementation and migration projects
- Act as member of the test automation community, contribute to the test automation governance and drive all test automation activities
- Align test automation activities with the Test Management, but also Application Development team members
- Participate in POCs and prototype initiatives
- Document test automation activities and report all identified quality issues and defects
- Support the Head of Test Management with general improvements of the QA/Test Procedure
- Closely collaborate with Business Analysts, Developers and other department members

WORKING FOR ADVANZIA

THE UNCONVENTIONAL BANK

ABOUT YOU | What's your background?

- Bachelor or Master's degree in Information Technology, Business Informatics, or equivalent significant professional work experience
- Practical experience in structured programming (e.g. Python, JavaScript, SQL)
